- Restriction to one of the following inventions is required under 35 U.S.C. § 121:
- I. Claims 1-11, drawn to a method of treatment/modulating the immune response, classified in Class 424, subclass 278.1.
- II. Claims 12-18, drawn to a protein composition, classified in Class 514, subclass 21.
- Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)).

In the instant case, the product as claimed can be used in a materially different process such as a nutritional supplement.

- Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
- A telephone call was made to Catherine Joyce on 11/10/99 to request an oral election to the above restriction requirement; a written requirement was requested.
- Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
